What's New

Version 01.01

The following features and bug fixes have been added to `Action Utilities` in version 01.01. The initial release includes the following features:

- **Documentation** - Fixed documentation for including the framework in an app project.
- **Minor Fixes** - Added several minor fixes to the framework.

Version 01.00

The following features and bug fixes have been added to `Action Utilities` in version 01.00. The initial release includes the following features:

- **Action Extensions** - Extend common, built-in Cocoa, Cocoa Touch and Swift data types.
- **General Utilities** - Add several, general utility classes to handle common tasks.
- **Hardware Utilities** - Provide information about the device that an app is running on.
